Finding a quilting stencil to fit in a specific quilt block is often frustrating. They are either too small or too large. The feather designs are beautiful but often times hard to locate the correct size. Here is a simple way to construct a feathered stencil. The different size teardrop depends on the size of stencil you need.....

1. Make the "spine" or basic shape you need. It may be a scallop, a circle or even a heart.
2. Lay the teardrop template on the spine, adjusting it so point "A" rests on the spine and "B" meets the edge of the other teardrop.
3. Continue in this fashion until the spine is completely covered. You may have to adjust and "fudge" in order to get the ends to come out evenly.

WORKSHOPS...

Remember, members are welcome to attend any of the workshops. They are held the fourth Monday of each month, either at 1:00p.m. or 7:30p.m. Bring your current sewing project and enjoy an afternoon/evening with friends--old and new!!
